CCL25 (C) Antibody, Rabbit Polyclonal

Cat#: R0131-1 Lot#: Refer to vial
Quantity: 100 ug Application: ELISA
Predicted M.W.: 17 kDa Uniprot ID: O35903

Background:

Chemokine (C-C motif) ligand 25 (CCL25) is a member of the subfamily of small cytokine CC genes characterized by two adjacent cysteine residues. CCL25 has been shown to display chemotactic activity for thymocytes, THP-1 cells, dendritic cells and activated macrophages but is inactive on peripheral blood lymphocytes and neutrophils. CCL25 binds to CCR9.

Other Names:

A130072A22Rik, Al852536, CKb15, Scya25, TECK, Chemokine TECK, Small-inducible cytokine A25, Thymus-expressed chemokine

Source and Purity:

Rabbit polyclonal antibodies were produced by immunizing animals with a GST-fusion protein containing the C-terminal region of mouse CCL25. Antibodies were purified by affinity purification using immunogen.

Storage Buffer and Condition:

Supplied in 1 x PBS (pH 7.4), 100 ug/ml BSA, 40% Glycerol, 0.01% NaN₃. Store at -20 $^{\circ}$ C. Stable for 6 months from date of receipt.

Species Specificity:

Mouse

Tested Applications:

ELISA: 1:1,000- 1:10,000 (detect native recombinant protein in a direct ELISA assay). Suitable for using as ELISA capture or detection antibodies.

Last Update: 03/2011
