FAF1 (C) Antibody, Rabbit Polyclonal

Cat#: R1888-2

Quantity: 100 ul

Predicted | Observed M.W.: 74 | 80 kDa

Lot#: Refer to vial

Application: WB

Uniprot ID: Q9UNN5

Background:

FAS-associated factor 1 (FAF1) is involved in the apoptotic process, possibly by binding and inhibiting chaperone activity. FAF1 contains a UBA domain and a UBX domain. It can potentiate but not initiate FAS-induced apoptosis. FAF1 interacts with the cytoplasmic domain of FAS and with the NLRP12 DAPIN/PYRIN domain via its UBA domain. Reduction in FAF1 expression is associated with gastric carcinoma.

Other Names:

FAS-associated factor 1, hFAF1, UBX domain-containing protein 12, UBX domain-containing protein 3A, UBXD12, UBXN3A

Source and Purity:

Rabbit polyclonal antibodies were produced by immunizing animals with a GST-fusion protein containing the C-terminal region of human FAF1. Antibodies were purified by affinity purification using immunogen.

Storage Buffer and Condition:

Supplied in 1 x PBS (pH 7.4), 100 ug/ml BSA, 40% Glycerol, 0.01% NaN₃. Store at -20 °C. Stable for 6 months from date of receipt.

Species Specificity:

Human, Mouse

Tested Applications:

WB: 1:1,000-1:3,000 (detect endogenous protein*)

*: The apparent protein size on WB may be different from the calculated M.W. due to modifications.

Product Data:

Fig 1. Western blot of total cell extracts from (A) mouse brain, (B) mouse thymus, using anti-FAF1 (C) (R1888-2) at RT for 2 h.
